

Meet the
Future of
Marine
Autonomy

The Compass Surveyor

Uncrewed Survey Vehicle (USV)

Crafted for Precision. Powered by Innovation.

> Overview

The Compass Surveyor USV was built with one mission in mind – to do more with less. **Less crew. Less downtime. No Compromise.**

Its **catamaran design, advanced proportion system, and autonomous capabilities** make it the go-to solution for offshore survey, monitoring, and deployment operations. The Compass Surveyor USV is designed to handle complex missions with ease.

Remotely piloted or running autonomously, it integrates intelligent software with robust mechanical systems to deliver mission reliability at scale.

> Specifications

★ DIMENSIONS

LOA: 8.3m
Beam: 2.8m
Height: 2.8m (bottom of ship to top of radar)
Moulded depth: 1m
Hull Spacing: 0.8m
Draft: 0.3 ~ 0.4m

★ GENERAL

Hull Material: Marine Grade Aluminum alloy
Displacement: 3t (exclude deck machinery, fuel, sensor payload)
Payload Capacity: 500kg
Deck machinery: Lifting mechanism*2, Towing Winch*1, SVP winch*1

★ PROPULSION

Batteries: Li-ion Battery
Generators: 2*18kw diesel generator
Propulsion: 4*6kw electric propeller
Survey speed: 4kn
Maximum speed: 6kn
Fuel Capacity: >400L*2 (diesel)
Endurance: 4kn @8 days/24hrs

★ CONTROL & NAVIGATION

Remote control: Over-the-horizon
Autonomous Control: Ocean Alpha Navigation & Mission Software
Communication: Starlink, VHF, Wireless broadband radio 1.4ghz – 10km

★ SAFETY

Navigation Radar
AIS
360 degree camera
FLIR

★ OPERATION

Sea state 3

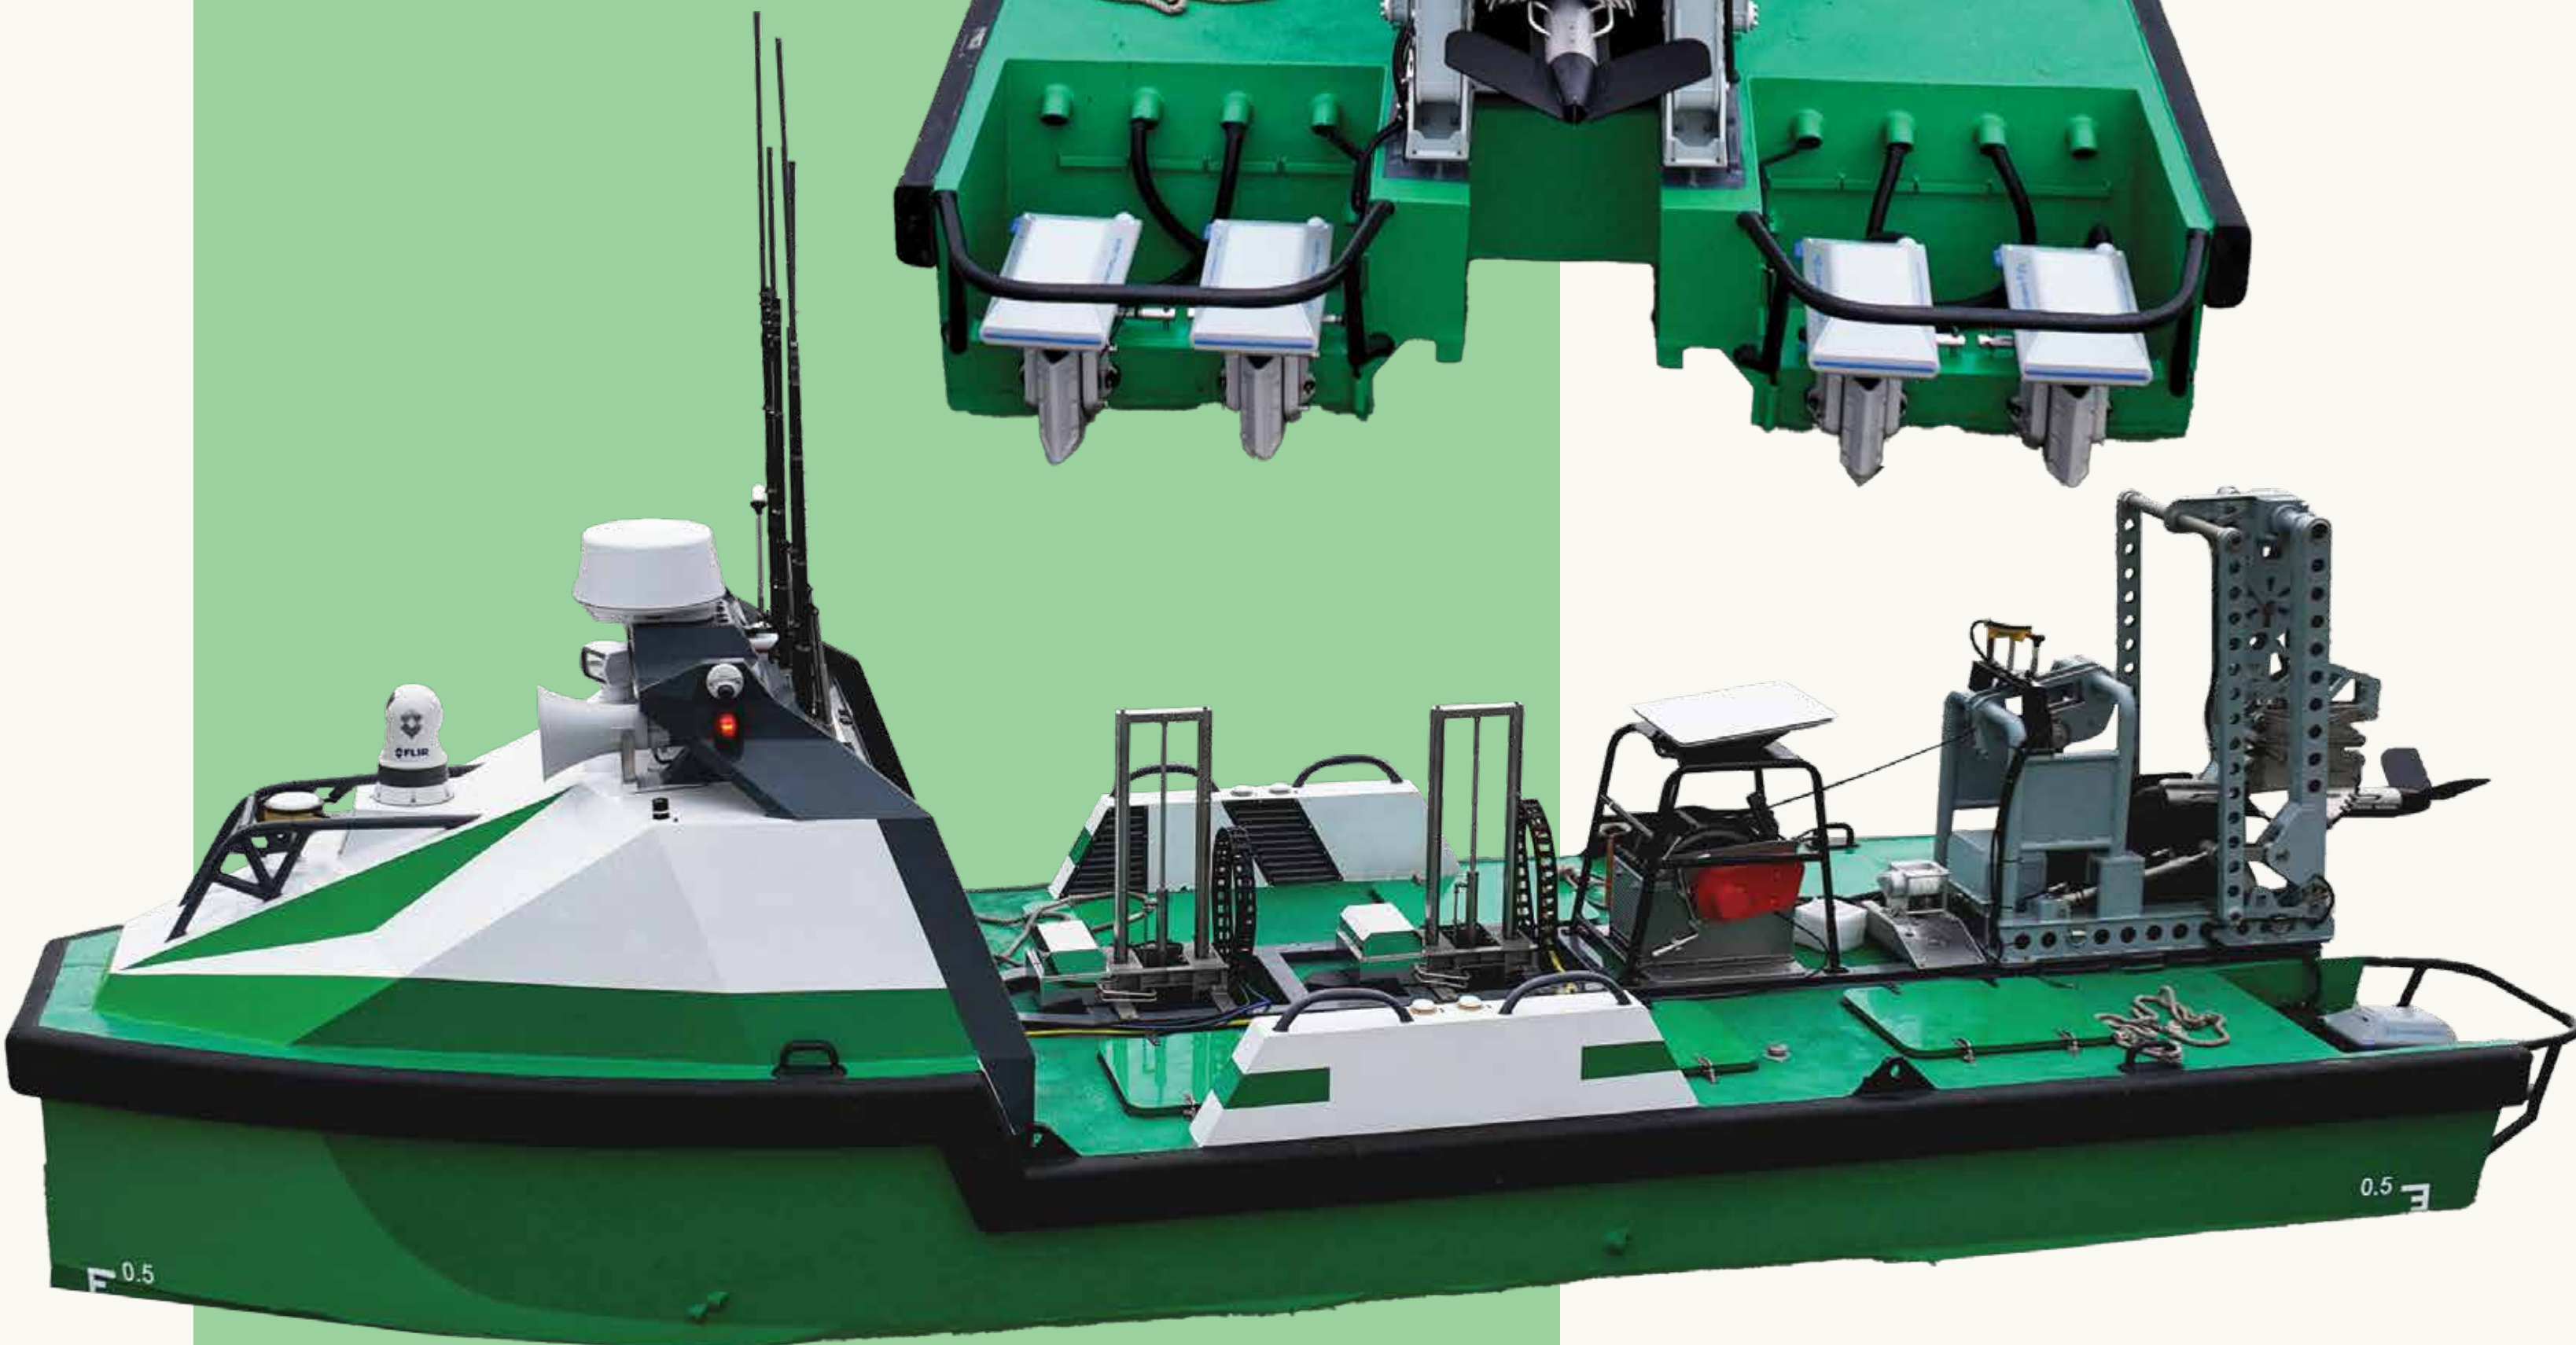

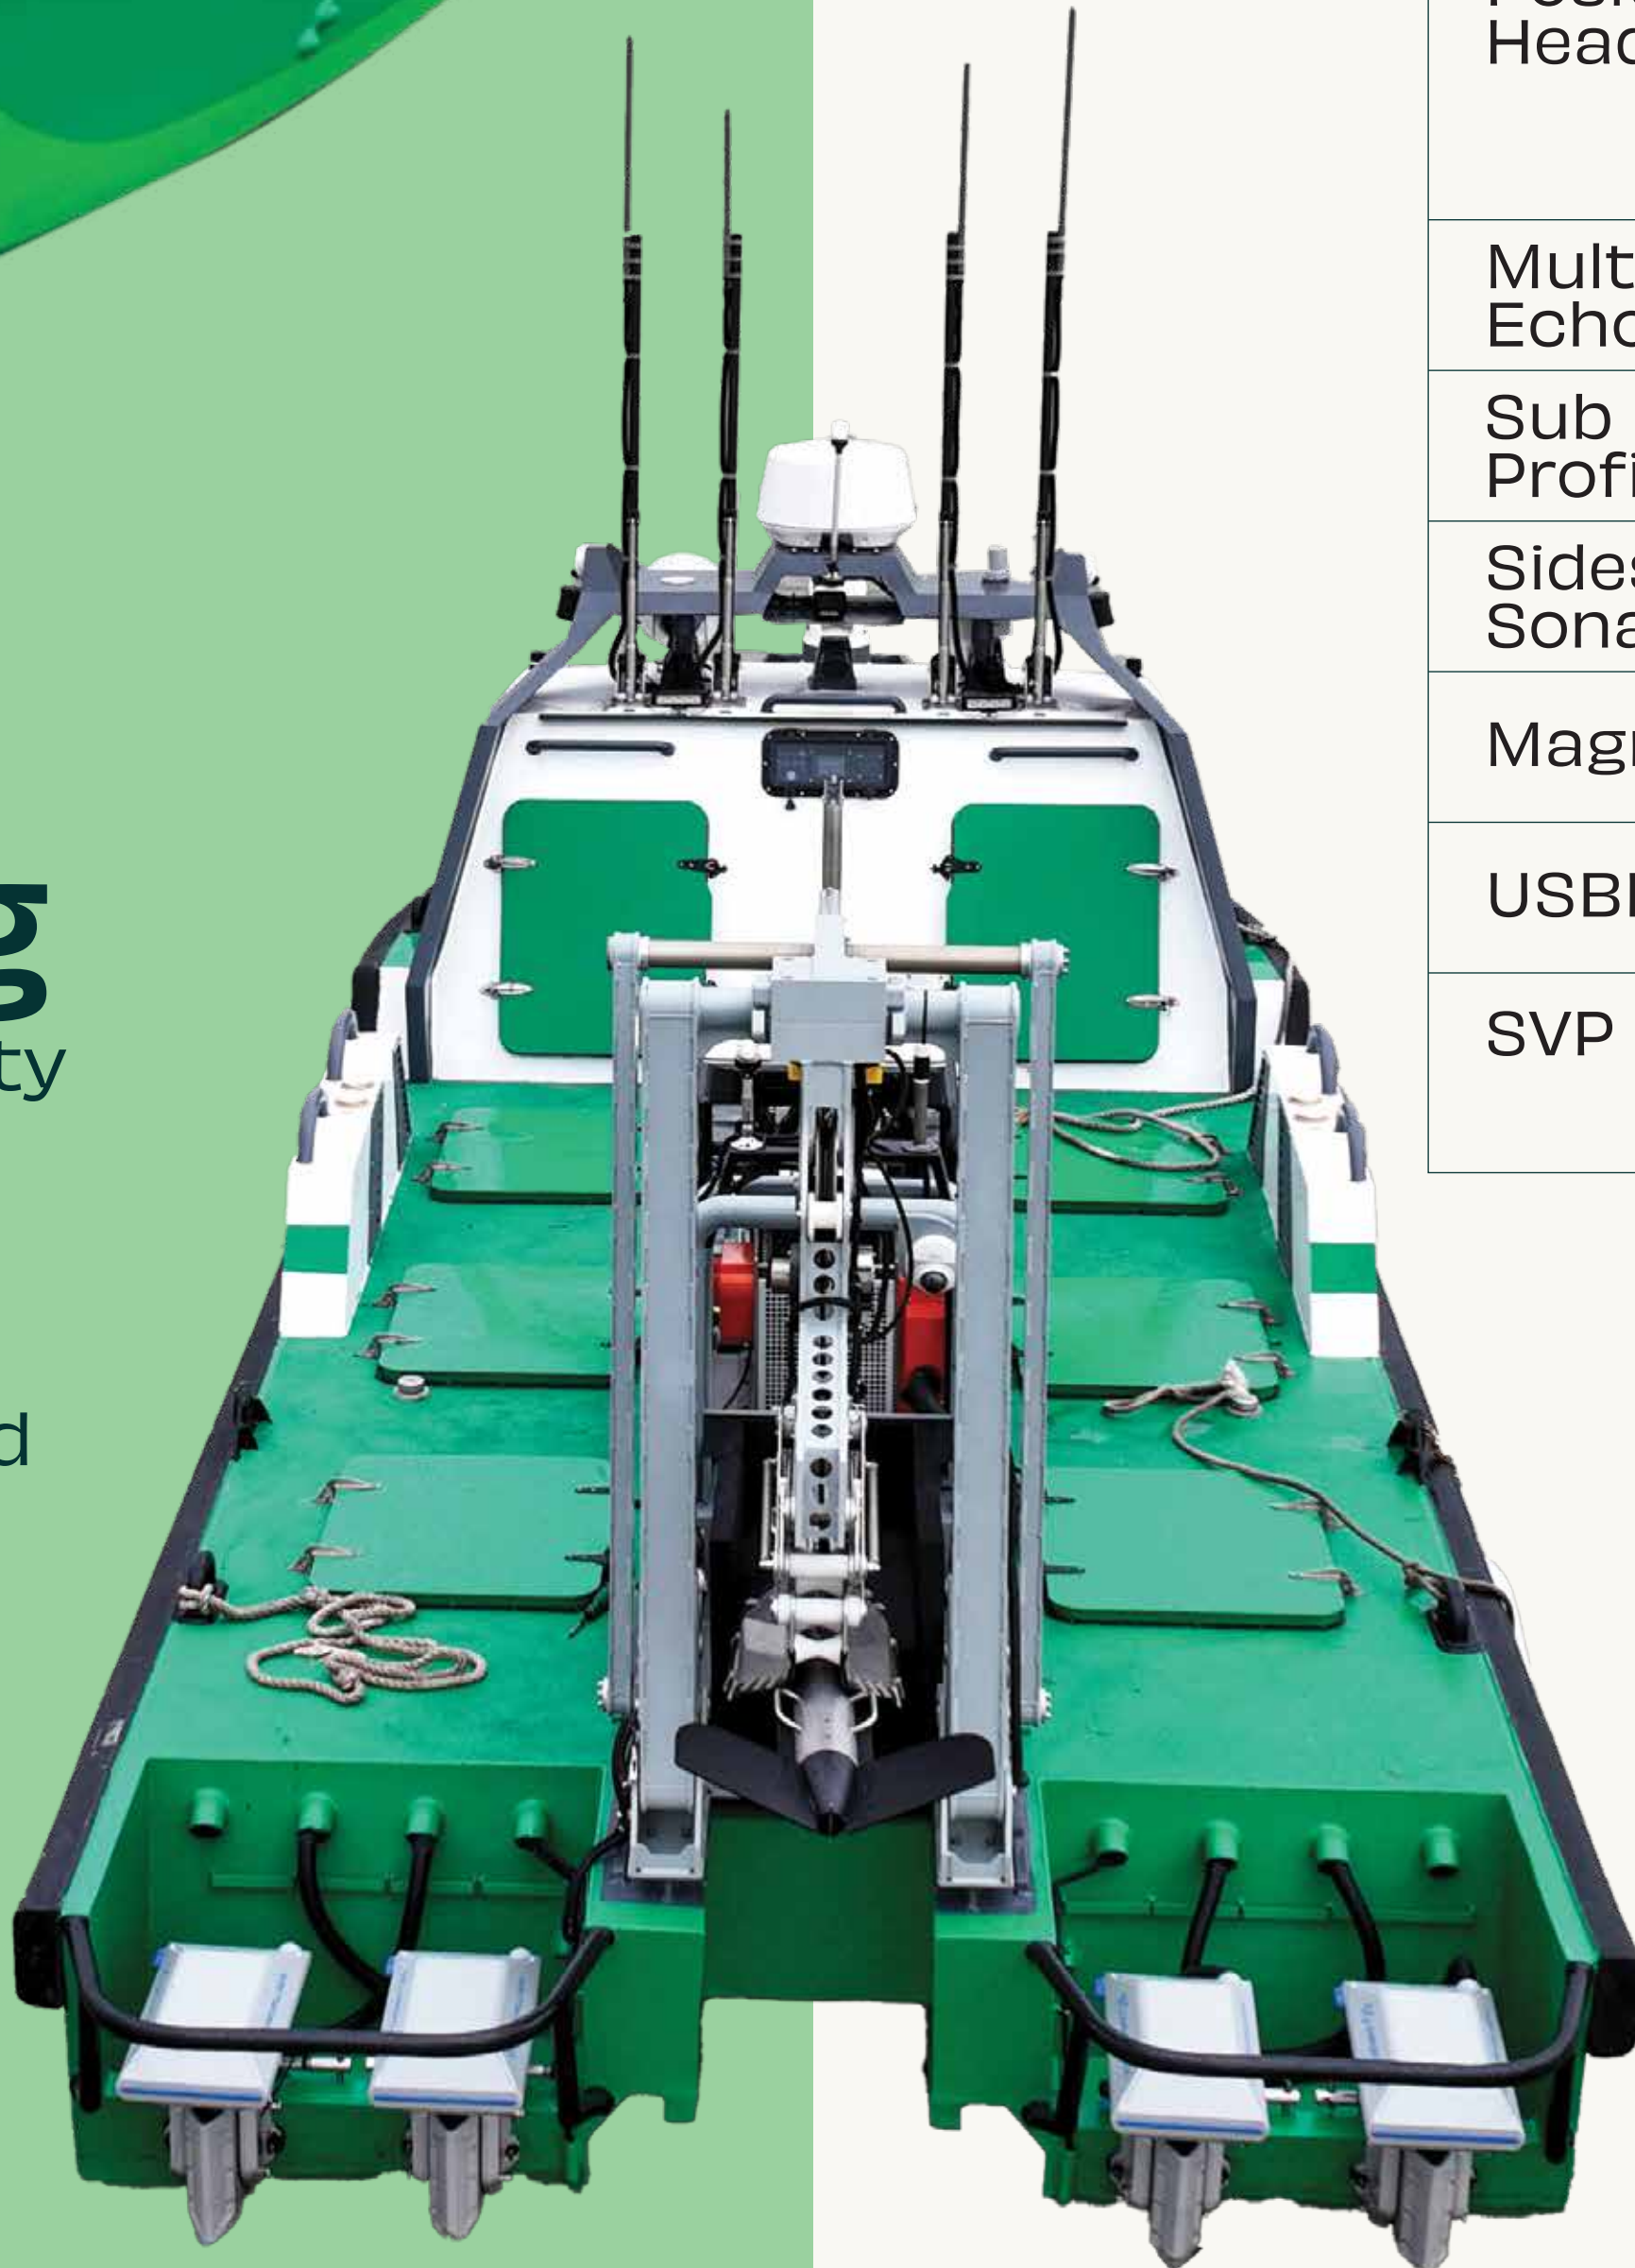

Smart Control.
Seamless Deployment.

★ EQUIPMENT

INS/Motion Sensor	SBG Navsight Apogee
Position & Heading	Trimble BX992, Trimble Zephyr 3 Rugged dual antenna, Trimble Centerpoint RTX Marine
Multibeam Echosounder	Teledyne Reson T50, EdgeTech 6205
Sub Bottom Profiler	EdgeTech 3400
Sidescan Sonar	EdgeTech 6205, Beijing Hydrotech S4090
Magnetometer	OFG Hypermag
USBL	Applied Acoustics Nexus 2
SVP	AML-3, AML SVS AML Crude Oil Sensor

★ 500kg
Payload Capacity

★ 6kn
Maximum Speed
